

Biology Triton Transfer Tips

Guidance and advice to help navigate your upcoming years as a Biology major

First Steps:

- Visit the [Triton Transfer Hub](#)
- Use your first quarter to identify resources on campus
 - Student organizations and experiential opportunities
- [Schedule an appointment with biology](#) and your college advisor within your first two quarters at UCSD
 - Draft an individualized long term plan to graduate

How can I excel academically?

- Get to know the [Campus Community Centers](#)
- Consider [study abroad](#) the summer of your first year
- Attend office hours to clarify lecture material, ask questions, and get to know your instructor and IA
- Utilize tutoring services for additional support with challenging courses
 - [Academic Achievement Hub](#), OASIS

Where can I access more resources & stay connected?

- Attend [information sessions](#) that interest you
- Create a LinkedIn profile to expand your network
- Check out Biological Science [online resources](#):
 - Biology website, Bio Bulletin (blog), and subscribe to the weekly newsletter

How can I advance as a professional within the Biology field?

- Connect with the [Career Center](#) advising team for any questions pertaining to graduate/professional school, potential career opportunities, and networking opportunities
- Reach out to your Biology major [faculty advisor](#) who are subject-matter experts that guide students along their individual academic and professional goals
- Begin to explore internship/volunteer opportunities on the [Research Experience & Applied Learning \(REAL\) Portal](#) and [Handshake](#)
